

How to make yourself irreplaceable with AI.

RUSH

We're an 100+ strong and growing team of the best product, design and engineering talent in New Zealand.

We come together to design and build apps and digital products to better serve humankind. We love to do so with bold clients to solve wicked problems at speed and scale.

Like you, we strive to create innovative solutions to support Kiwis everyday.

OUR PURPOSE

we design and build technology
to better serve humankind.

Our values.

We're a highly collaborative group with a human centred approach. We celebrate client achievements first and we know that success is a team effort.

We dare to be bold and we know that by taking informed and measured leaps we can change the game for an entire market.

We believe that a better future happens by design, not by chance. We can be trusted to show clients a better future and mitigate risk. Good things take time.

We value respectful, straight talk and so do our clients. We give honest opinions on tech and can be trusted to make ethical, balanced and agnostic tech decisions.

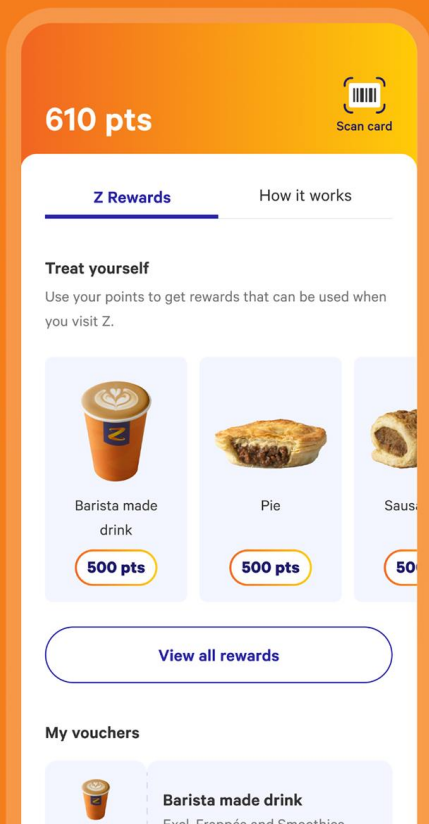

We love to get people excited. We bring enthusiasm for creating something new, learning something new, shipping something that our client' users will love – and that ultimately delivers results.

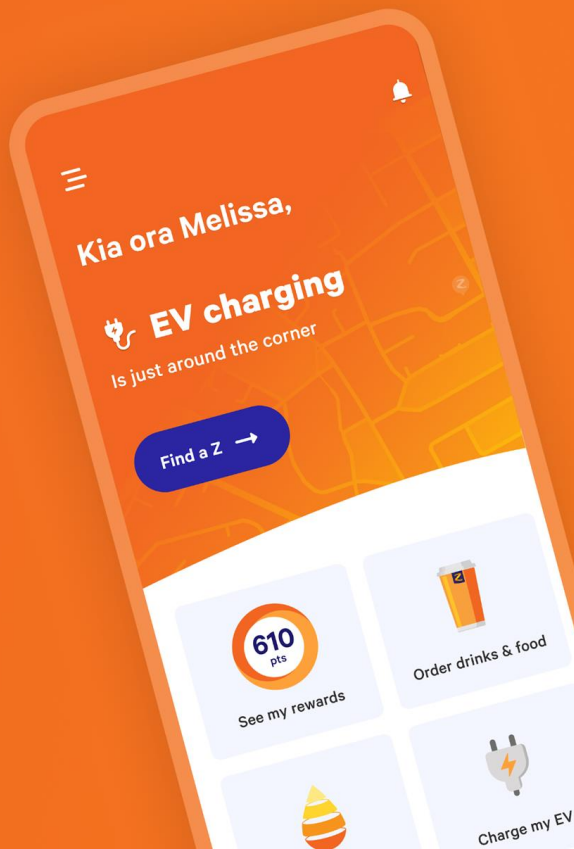

In the last 12 months, we've made better happen with:

NZ COVID Loyalty App

A studio setting with three men seated on a grey sofa. The man on the left, wearing glasses and a dark suit, holds a notepad and pen, gesturing with his hand. The man in the middle, also in a dark suit, has his hands clasped. The man on the right, with a beard and wearing a black long-sleeved shirt with a red 'R' logo and patterned shorts, sits with his hands clasped. The background is a large screen displaying a beach scene at sunset. A small round wooden table is in front of them.

Trust me I'm
an engineer.

how it started

How did we get to here with Generative AI?

Intel's co-founder Gordon Moore said that *“the number of transistors on a chip will double every two years.”*

This simple observation has been held for over 50 years – directly affecting computing power and memory.

Raytheon Apollo 11 Guidance Computer

\$1,500,000 cost per unit
2 MHz
0.8 MB memory
75 units made

Apple iPhone 16 Pro Max

\$800 cost per unit
18,000 MHz
8,000 MB memory
2.3 billion iPhones Ever Made & Sold

Your iPhone has a 16.9 million times better price-to-performance ratio than the Apollo Guidance Computer.

The study concluded that understanding the “shape and position of the frontier” are crucial to optimize the impact of AI on worker productivity – MIT & Boston Consulting Group Study

Confidence

Rising to the Challenge.

The Challenge.

- Twelve months ago, Heather was focused on performance, recruitment, onboarding, and culture.
- Opportunity to overhaul RUSH Managed Services
- Why heather? **People were at the core of the change** – we needed better customers experience and happier staff.
- Suddenly responsible for our people, but for clients and end users too.
- A whole new world around commerciality & tech.

Tackling the Challenge Head-On.

- Learn & Scale quickly
- Understand new professions
- Drive performance in a totally new expertise area.
- Heather built an AI-powered approach

Meet My AI Specialists.

How I use AI:

 **General Assistant**: Upskilled on Managed Services, Support Models & Tech operations

 **Sales Coach**: Custom GPTs for pre-sales pitches

 **Researcher**: Deep market analysis on industry trends

 **Coach**: Leadership prompts and team support

What can I help with?

I am starting a new role as Head of People and Performance. I already lead the People and Culture Function but will be taking on a new responsibility leading the Managed Services Function. Can you please give me some tips on what I need to think about in taking on this role? |

What can I help with?

I need some advice / coaching please. How do I stop 'Dave the Dominator' from interrupting me in every meeting without launching a TED Talk on active listening?

Search

Deep research

Create image

Absolutely — this is a common (and frustrating) challenge. Here's a practical breakdown of how to deal with a habitual interrupter like "Dave the Dominator" without giving a sermon on communication theory or turning the meeting into a training session.

Understand the Behaviour First

Before jumping into tactics, it helps to clarify what's happening:

- **Pattern:** Is Dave interrupting only you or others too?
- **Trigger:** Is it when you're giving updates, sharing ideas, challenging something?
- **Impact:** Is it derailing your points, undermining authority, or just steamrolling?

Knowing this helps you choose the right approach (and evidence if needed).

To be Irreplaceable with AI, be strategic.
